

THE  
IBIS

JOURNAL OF THE BRITISH  
ORNITHOLOGISTS' UNION

VOLUME 114, 1972

# VOLUME 114

## DATES OF ISSUE

|                               |                               |
|-------------------------------|-------------------------------|
| No. 1. Issued 1 January 1972. | No. 3. Issued 1 July 1972.    |
| No. 2. Issued 1 April 1972.   | No. 4. Issued 1 October 1972. |

## CONTENTS OF VOL 114 1972

|                                          | Page |
|------------------------------------------|------|
| Contents . . . . .                       | ii   |
| B.O.U. Officers and Medallists . . . . . | vii  |
| Members elected during 1972 . . . . .    | xi   |

### No. 1

|                                                                                                                                     |    |
|-------------------------------------------------------------------------------------------------------------------------------------|----|
| C. H. FRY. The social organisation of bee-eaters (Meropidae) and co-operative breeding in hot-climate birds . . . . .               | 1  |
| M. P. KAHL. Comparative ethology of the Ciconiidae. The wood-storks (genera <i>Mycteria</i> and <i>Ibis</i> ) . . . . .             | 15 |
| J. C. COULSON & JEAN M. HOROBIN. The annual re-occupation of breeding sites by the Fulmar . . . . .                                 | 30 |
| D. J. PEARSON. The wintering and migration of palaeartic passerines at Kampala, southern Uganda . . . . .                           | 43 |
| WALTER J. BOCK. Morphology of the tongue apparatus of <i>Ciridops anna</i> (Drepanididae) . . . . .                                 | 61 |
| D. D. B. SUMMERS. Pterylography, plumage development and moult of Japanese Quail <i>Coturnix c. japonica</i> in captivity . . . . . | 79 |
| P. R. COLSTON. A new bulbul from southwestern Madagascar . . . . .                                                                  | 89 |

### Short Communications

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| M. H. MACROBERTS & B. R. MACROBERTS. The relationship between laying date and incubation period in Herring and Lesser Black-backed Gulls . . . . . | 93  |
| DAVID B. WINGATE. First successful hand-rearing of an abandoned Bermuda Petrel chick . . . . .                                                     | 97  |
| J. RILEY. The pathology of <i>Anisakis</i> nematode infections of the Fulmar <i>Fulmarus glacialis</i> . . . . .                                   | 102 |
| V. W. SMITH & F. E. G. COX. Blood parasites and the weights of palaeartic migrants in central Nigeria . . . . .                                    | 105 |
| V. P. W. LOWE. Distraction display by a Woodcock with chicks . . . . .                                                                             | 106 |

## LIST OF PLATES IN VOL. 114

| Plate |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Facing Page |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| 1.    | (a) Preening of lower neck and upper breast <i>I. ibis</i> , Kisumu, Kenya, April 1966<br>(b) Female allopreening male in breast feathers. <i>M. americana</i> , Corkscrew Swamp, Florida, USA, February 1969<br>(c) Rubbing the head on the feathers of the upper back <i>I. leucocephalus</i> , Bharatpur, India, September 1967<br>(d) Panting in response to high (c. 33°C) ambient temperature. <i>I. leucocephalus</i> , Bharatpur, India, September 1966 | 16          |
| 2.    | (a) Low-intensity Forward Threat. Bird does not have facial skin retracted. <i>I. ibis</i> . Lake Nakuru, Kenya, December 1965<br>(b) High-intensity Forward Threat, with full erection of plumage, bill gaped open, and head shaken from side to side. <i>M. americana</i> , near Corkscrew Swamp, Florida, USA, March 1959                                                                                                                                    | 16          |
| 3.    | (a) Forward Clattering Threats being performed by two males near a developing breeding colony. Female is Gaping. <i>I. ibis</i> , Kisumu, Kenya, March 1966<br>(b) Two pairs engaging in a bout of Forward Clattering Threats. Males are displaying to each other, and females to each other. <i>I. leucocephalus</i> , Bharatpur, India, September 1967                                                                                                        | 16          |

| Plate |                                                                                                                                                                | Facing Page |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| 4.    | (a) Snap display given by a male on a potential nest-site, as a female is approaching.<br><i>I. ibis</i> , Kisumu, Kenya, April 1966                           |             |
|       | (b) Anxiety Stretch given by bird near nest in response to approaching observer.<br><i>I. leucocephalus</i> , Bharatpur, India, October 1967                   |             |
|       | (c) A female Gaping as she approaches an unmated male on a nest-site. <i>I. ibis</i> ,<br>Kisumu, Kenya, April 1966                                            |             |
|       | (d) Unmated male giving Display Preening, while Gaping female stands nearby.<br><i>I. leucocephalus</i> , Bharatpur, India, September 1967                     | 17          |
| 5.    | (a) Stretching leg and wing on the same side. <i>I. cinereus</i> , Pulau Dua, Java,<br>Indonesia, March 1968                                                   |             |
|       | (b) Unmated male giving Display Preening, as a Gaping female approaches the<br>nest site. <i>I. ibis</i> , Kisumu, Kenya, April 1966                           | 17          |
| 6.    | Male giving an Up-Down as his newly acquired mate approaches their nest-site.<br><i>I. ibis</i> , Kisumu, Kenya, April 1966                                    | 17          |
| 7.    | (a) A female in the Balancing Posture and Gaping, approaching an unmated male<br>on a nest-site. <i>I. ibis</i> , Kisumu, Kenya, April 1966                    |             |
|       | (b) Copulation Clattering performed on the nest platform. <i>I. ibis</i> , Kisumu,<br>Kenya, April 1966                                                        | 17          |
| 8.    | (a) A cluster of <i>Anisakis</i> larvae in the proventricular wall of the Fulmar                                                                               |             |
|       | (b) A section through an ulcer caused by <i>Anisakis</i> larvae                                                                                                | 103         |
| 9.    | Calfbird adult, chick, and nests                                                                                                                               | 139         |
| 10.   | (a) Cleistocarp of <i>Ctenomyces serratus</i> developed on a wool bait <i>in vitro</i> , showing the<br>characteristic hooked appendages                       |             |
|       | (b) Cleistocarp of <i>Ctenomyces serratus</i> developed on a partridge feather <i>in vivo</i> ,<br>showing the appendages hooked into the feather barbs        | 174         |
| 11.   | (a) Well-developed dust-devil near Shombole, in the Kenya Rift Valley                                                                                          |             |
|       | (b) Good soaring weather over the Salei plains                                                                                                                 | 184         |
| 12.   | Three Rüppell's Griffons <i>Gyps rüppellii</i> flying in formation at the Gol Cliffs                                                                           | 194         |
| 13.   | (a) Part of a flock of White Storks <i>Ciconia ciconia</i> gliding straight, between thermals,<br>in typical loose formation                                   |             |
|       | (b) Part of a flock of White Pelicans <i>Pelecanus onocrotalus</i> , gliding straight in<br>typical multiple-V formation                                       | 195         |
| 14.   | Scanning electron micrographs of barbules at the extreme non-coherent tip of breast<br>feathers—(a) <i>Sula bassana</i> , (b) <i>Cinclus cinclus</i>           | 266         |
| 15.   | Scanning electron micrographs of barbules at the extreme non-coherent tip of breast<br>feathers. (a) <i>Phalaropus fulicarius</i> , (b) <i>Fulica atra</i>     | 267         |
| 16.   | Nest of the Seychelles Swiftlet <i>Collocalia</i> detached from the upper colony                                                                               | 272         |
| 17.   | Lower colony of the Seychelles Swiftlet <i>Collocalia</i>                                                                                                      | 273         |
| 18.   | Scorched back-feather of Dunlin trapped at Pori, Finland, on 10 August 1962                                                                                    | 274         |
| 19.   | (a) C-subcolony of Royal Terns <i>Sterna (Thalasseus) maxima maxima</i> , 1967; most<br>exposed site on Fisherman's Island that year                           |             |
|       | (b) Main 1967 site (A), with c. 4,500 pairs (Fisherman's Island)                                                                                               | 346         |
| 20.   | (a) Typical colony, seen from nearby observation location, once they had begun to<br>settle down following a disturbance (Fisherman's Island, 1968)            |             |
|       | (b) Adult Sandwich Tern attending creche with adult Royals (Oregon Inlet, 1969)                                                                                | 347         |
| 21.   | (a) Solicitous adults and demanding chick (Oregon Inlet, 1969)                                                                                                 |             |
|       | (b) Adult protecting or shielding chick, in loose, relaxed creche (Oregon Inlet, 1969)                                                                         | 352         |
| 22.   | (a) Alarmed creche beginning to coalesce and move away; adults taking wing<br>(Oregon Inlet, 1969)                                                             |             |
|       | (b) Alarmed juveniles in creche leaving water; some just ready to fledge (Fisherman's<br>Island, 1967)                                                         | 353         |
| 23.   | Patterns produced by the egg white proteins of the large ratites, a kiwi, a tinamou<br>and the domestic fowl in an acrylamide gel isoelectric focussing system | 383         |
| 24.   | Derek Goodwin and Norman Moore                                                                                                                                 | 426         |
| 25.   | Flocking and feeding in the Great Tit. Four types of searching place used in<br>experiment III                                                                 | 509         |
| 26.   | James Maurice Harrison                                                                                                                                         | 559         |
